Subject: Please Support the Consensus Plan -- FCC WT Docket #02-55

Commissioner Kathleen Q. Abernathy
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Commissioner Abernathy,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 800 grass roots public safety agencies or officials, local governments, and congressional officials support this Plan because it eliminates

interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The more than 4000 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Mike Fabich
